While the overall market is efficient, pockets of inefficiency do exist. Wakefield Asset Management offers a unique investment strategy which we believe stands apart from the mainstream investment community. Focusing on proprietary investment techniques that not only identify market inefficiencies, but capture those inefficiencies over time. Wakefield uses a highly disciplined and technologically advanced process for research, security selection, implementation, and monitoring. The resulting portfolios exhibit a unique combination of characteristics with positive near-term expectations that, in our view, will be rewarded by the market in the period ahead regardless of market direction. In our management and research, our goals are Focus, Creativity, Intellectual Honesty, and Continuous Improvement.

Wakefield Biblically Responsible Equity Portfolio incorporates an additional layer in the stock selection process meant to exclude publically traded companies that do not adhere to a specific set of Biblical values. These additional screening criteria are closely aligned with the investing principles provided by the United States Conference of Catholic Bishops and Evangelical Christian investment guidelines.
